PRESIDENT'S REPORT

Sorry I missed the meeting but I hear the "Gary and Dave Show" did just fine. No train stores in Hawaii but lots of fun and sun.

I have been informed of the discussion and decision by the members regarding sending money to National; and I think you made the right decision as I do not see a viable / realistic financial plan. I will have more information after the next National BOD conference call, which has been delayed.

Be sure to come to the May meeting as we only have 2 meetings prior to the summer break.

Also take a good look at the BA Oil tank car and please place your order at the May meeting. This should be a sure winner.

See you at the meeting.
Mark

The Brighton and Rottingdean Seashore Electric Railway was a unique coastline railway in Brighton, England that ran through the shallow waters of the English Channel between 1896 and 1901. The single car used by the railway was a huge pier-like building which stood on four 23 ft. long legs, and thence the nickname "Daddy Long-legs".

Needless to say, there were more modest copy cats --->
